

# SDW-500 S E R I E S 

Industrial Ethernet 5-port Switch

## Legal information

The contents of this document are provided "as is". Except as required by applicable law, no warranties of any kind, either express or implied, including, but not limited to, the implied warranties of merchantability and fitness for a particular purpose, are made in relation to the accuracy and reliability or contents of this document. Westermo reserves the right to revise this document or withdraw it at any time without prior notice.

Under no circumstances shall Westermo be responsible for any loss of data or income or any special, incidental, and consequential or indirect damages howsoever caused.
More information about Westermo can be found at the following Internet address:

## http://www.westermo.com

## Safety

## Before installation:

Read this manual completely and gather all information on the unit. Make sure that you understand it fully. Check that your application does not exceed the safe operating specifications for this unit.
This unit should only be installed by qualified personnel.
This unit should be built-in to an apparatus cabinet, or similar, where access is restricted to service personnel only.
The power supply wiring must be sufficiently fused, and if necessary it must be possible to disconnect manually from the power supply. Ensure compliance to national installation regulations.
This unit uses convection cooling. To avoid obstructing the air flow around the unit, follow the spacing recommendations (see Installation section).

## Before mounting, using or removing this unit:

Prevent access to hazardous voltage by disconnecting the unit from power supply. Warning! Do not open connected unit. Hazardous voltage may occur within this unit when connected to power supply.

## 1

## Class 1 Laser Product

Do not look directly into fibre optical fibre port or any connected fibre although this unit is designed to meet the Class 1 Laser regulations.

## Care recommendations

Follow the care recommendations below to maintain full operation of unit and to fulfil the warranty obligations.
This unit must not be operating with removed covers or lids.
Do not attempt to disassemble the unit. There are no user serviceable parts inside.
Do not drop, knock or shake the unit, rough handling above the specification may cause damage to internal circuit boards.
Do not use harsh chemicals, cleaning solvents or strong detergents to clean the unit.
Do not paint the unit. Paint can clog the unit and prevent proper operation.
Do not expose the unit to any kind of liquids (rain, beverages, etc). The unit is not waterproof. Keep the unit within the specified humidity levels.
Do not use or store the unit in dusty, dirty areas, connectors as well as other mechanical part may be damaged.
If the unit is not working properly, contact the place of purchase, nearest Westermo distributor office or Westermo Tech support.
Fibre connectors are supplied with plugs to avoid contamination inside the optical port.
As long as no optical fibre is mounted on the connector, e.g. for storage, service or transportation, should the plug be applied.

## ATEX Information (Applicable for SDW-500 Ex series only)

## General

This unit is intended for use in Zone 2 hazardous location only.

## Marking

Ex $\| 3 \mathrm{G}$
Ex nA IIC $140^{\circ} \mathrm{C}$ (T3) Gc
SPECIAL CONDITION
WARNING - DO NOT SEPARATE WHEN ENERGIZED

| $\langle x\rangle$ | Indicate that this unit complies with relevant European standards that are harmonised with the 94/9/EC Directive (ATEX). |
| :---: | :---: |
| II | Equipment group II. <br> This unit can be installed in all places with an explosive gas atmosphere other than mines susceptible to firedamp. |
| 3 | Equipment category 3. <br> A category is the classification according to the required level of protection. This unit ensures the requisite level of protection during normal operation and is intended for use in areas in which explosive atmosphere caused by gases, vapours, mists, or dust mixtures are unlikely to occure or, if they do occure, are likely to do so only infrequently and for a short periode only. |
| G | Indicates protection concerning explosive atmospheres caused by gases, vapours or mists (G). |
| Ex | Indicates that this unit is in conformity with relevant European Ex standard(s). |
| nA | The type of protection used. <br> This unit is a non-sparking device " nA " which is constructed to minimize the risk of occurence of arcs or sparks capable of creating an ignition hazard during conditions of normal operation. |
| IIC | Gas group, a typical gas i hydrogen. |
| $140^{\circ} \mathrm{C}$ (T3) | Maximum surface temperature assigned $=140^{\circ} \mathrm{C}$ with the next highest temperature class $\mathrm{T} 3\left(\mathrm{~T} 3=200^{\circ} \mathrm{C}\right)$. <br> This unit is classified in accordance with its maximum surface temperature (external and internal). |
| Gc | Equipment protection level Gc (EPL Gc) <br> Equipment for explosive gas atmospheres, having a "enhanced" level of protection, which is not a source of ignition in normal operation and which may have some additional protection to ensure that it remains inactive as an ignition source in the case of regular expected occurences. EPL Gc are analogous to the ATEX Categories (Category $3 \mathrm{G}=$ EPL Gc). |
| SPECIAL CONDITION | This unit has a special condition for safe use. The special condition for safe use contains safety related information that is necesarry for the correct installation and safe use. |

## SPECIAL CONDITION FOR SAFE USE

## Ambient temperature:

This unit is designed for use in extreme ambient temperature conditions according to the following: SDW-550: $-25^{\circ} \mathrm{C} \leq \mathrm{Ta} \leq+70^{\circ} \mathrm{C}$
SDW-541: $-25^{\circ} \mathrm{C} \leq \mathrm{Ta} \leq+65^{\circ} \mathrm{C}$
SDW-532: $-25^{\circ} \mathrm{C} \leq \mathrm{Ta} \leq+60^{\circ} \mathrm{C}$

## Installation in an apparatus cabinet:

This unit requires installation in an Ex certified apparatus cabinet suitable for the area of use and providing a degree of protection of at least IP54.

## Resistance to impact:

This unit requires installation in an apparatus cabinet where adequate resistance to impact is provided by the apparatus cabinet. See "Installation in an apparatus cabinet" above for requirements on the external apparatus cabinet.

## Resistance to light:

This unit requires installation in an apparatus cabinet where it is protected from light (for example daylight or light from luminaires).
See "Installation in an apparatus cabinet" above for requirements on the external apparatus cabinet.

## Secureness of plugs:

When this unit is installed in an explosive atmospheres, all connectors must be mechanically secured to prevent loosening.

## Conductor temperature:

When this unit is installed in locations with high ambient temperature, special precautions shall be taken upon the choice of external conductors and the temperature rating of the conductor(s).

## Directive 94/9/EC alongside with other directives:

Directive 2004/108/EC (EMC) applies and to assure a safe performance of this unit under the scope of Directive 94/9/EC, refer to the electromagnetic immunity level specified under "Type tests and environmental conditions" in this manual.

Standards and date of compliance
EN 60079-0 and EN 60079-15
2011-04-15

## Note. Fibre Optic Handling

Fibre optic equipment needs special treatment. It is very sensitive to dust and dirt. If the fibre will be disconnected from the modem the protective hood on the transmitter/ receiver must be connected. The protective hood must be kept on during transportation. The fibre optic cable must also be handle the same way.
If this recommendation not will be followed it can jeopardise the warranty.

## Cleaning of the optical connectors

In the event of contamination, the optical connectors should be cleaned by the use of forced nitrogen and some kind of cleaning stick.
Recommended cleaning fluids:

- Methyl-, ethyl-, isopropyl- or isobutyl-alcohol
- Hexane
- Naphtha

## Maintenance

No maintenance is required, as long as the unit is used as intended within the specified conditions.

## Agency approvals and standards compliance

| Weight | 0.2 kg |
| Mounting | DIN-rail |
| Degree of protection | IP21 |

## Configuration

Auto configured (auto-negotiation) or manually setting of speed and duplex of individual TX port, by DIP-switches.
Port mirror function is possible to set with DIP-switch. With the port mirror function active the switch will copy all outgoing traffic to port 1. This can be used to monitor all traffic going out from the switch. Packets may be discarded if the total throughput exceeds the port speed of port 1 .

## Description

The SDW-550 is an Industrial Ethernet 5-port switch.
All ports support auto-negotiation, but DIP-switches also allow speed and duplex configuration of any individual TX port. It is also possible to set up one port to monitor traffic to/from the switch.
The SDW-550 has been designed to meet high industrial specifications, providing very high dependability in harsh environmental conditions.

## Features:

::: TX shields individually isolated
:: Wide DC power range 12 - 48 VDC
:: Wide temperature range
:: Automatic MDI/MDI-X crossover
:: LED indicators for Power, Speed, Duplex, Link and Traffic
:: Port monitoring
:: 35 mm DIN rail mounting
:: Enable or disable of flow control

## Example of applications are:

:: 5-port switch
::: Ethernet isolator, for STP networks

## Interface specifications

| Power SDW-500 series |  |
| :---: | :---: |
| Rated voltage | 12-48 VDC, polarity protected |
| Operating voltage | $9.6-57.6 \mathrm{VDC}$ |
| Rated current | @12VDC power input |
|  | SDW-550 320 mA |
|  | SDW-541-MM-SC2 450 mA |
|  | SDW-541-MM-ST2 450 mA |
|  | SDW-541-SM-LC15 450 mA |
|  | SDW-541-SM-SC15 350 mA |
|  | SDW-541-SM-LC40 350 mA |
|  | SDW-541-MM-LC2 350 mA |
|  | SDW-532-2-MM-SC2 600 mA |
|  | SDW-532-2-MM-ST2 600 mA |
|  | SDW-532-2-SM-LC15 450 mA |
|  | SDW-532-2-SM-SC15 450 mA |

|  | SDW-532-MM-SC2-SM-SC15 450 mA |
| Rated frequency | DC |
| Connection | Detachable screw terminal |
| Connector size | $0.2-2.5 \mathrm{~mm}^{2}$ (AWG 24-12) |

| Ethernet TX |  |
| :--- | :--- |
| Electrical specification | IEEE std 802.3 .2000 edition |
| Data rate | $10 \mathrm{Mbit} / \mathrm{s}$ or $100 \mathrm{Mbit} / \mathrm{s}$, manual or auto |
| Duplex | Full or half, manual or auto |
| Connection | SC, ST or LC |
| Circuit type | Optical |
| Transmission range | 100 m |

| Ethernet FX |  |
| :--- | :--- |
| Electrical specification | IEEE std 802.3 .2000 edition |
| Data rate | $10 \mathrm{Mbit} / \mathrm{s}$ or $100 \mathrm{Mbit} / \mathrm{s}$, manual or auto |
| Duplex | Full or half, manual or auto |
| Connection | SC, ST or LC |
| Circuit type | Optical |
| Transmission range | 100 m |

## Connections

## Available models:

:: SDW-550 10/100Base-T/TX: 5 ports
:: SDW-541 10/100Base-T/TX: 4 ports 100Base-FX: 1 port
::: SDW-532 10/100Base-T/TX: 3 ports 100Base-FX: 2 ports
NOTE! SDW-532-MM-SC2-SM-SC15
Port 4: SC Single mode 15 km connector
Port 5: SC Multi mode 2 km connector

## Power

The SDW-500 series supports redundant power connection. The positive input are +VA and +VB , the negative input
 for both supplies are COM. The power is drawn from the input with the highest voltage.

| 3-pos screw terminal | Description | Power |
| :---: | :--- | :--- |
| 1 | COM | 0 V |
| 2 | + VA | A: $9.6-57.6 \mathrm{VDC}$ |
| 3 | +VB | B: $9.6-57.6 \mathrm{VDC}$ |

## TX

Ethernet TX connection (RJ-45 connector), automatic MDI/MDI-X crossover.

| Contact | Signal Name | Direction | Description/Remark |
| :---: | :---: | :---: | :--- |
| 1 | TD + | In/Out | Transmitted/Received data |
| 2 | TD- | In/Out | Transmitted/Received data |

| 5 | - | - | - |
| 6 | RD- | In/Out | Transmitted/Received data |
| 7 | - | - | - |
| 8 | - | - | - |
| Shield | - | - | HF-connected |

CAT 5 cable is recommended.
Unshielded (UTP) or shielded (STP) connector might be used.

## FX SC Multi- or single mode (optional)

Ethernet FX connection.
1300 nm multi- or singlemode fibre tranceiver with SC-connector.
The dust protection plug shall be mounted when no fibre is connected.

## FX ST Multi mode (optional)

Ethernet FX connection.
1300 nm multi mode fibre tranceiver with ST-connector.
The dust protection plugs shall be mounted when no fibre is connected.

## FX LC Multi- or single mode (optional)

Ethernet FX connection.
1300 nm singlemode fibre transceiver with LC-connector.

The dust protection plug shall be mounted when no fibre is connected.

## LED indicators

At power on the PWR flashes during initialising.
Indicators (LED) Power (PWR)
Link (LINK) of every port
Speed (SPD) and duplex (DPX) of TX ports

| LED | Status | Indication of |
| :--- | :--- | :--- |
| PWR | ON | Internal power, initialising OK |
|  | Slow flash | Initialisation progressing |
|  | Fast flash | Initialisation error |
|  | OFF | No Ethernet link |
|  | ON | Good Ethernet link |
|  | Flash | Ethernet data is transmitted or received, traffic indication |
| SPD | OFF | 10 Mbit/s |
| (TX only) | ON | 100 Mbit/s |
| DPX | OFF | Half duplex |
| (TX only) | ON | Full duplex |

## DIP switch settings SDW-550

DIP-switches are accessible under the lid on top of the unit. DIP-switches are used to configure the unit.

## Warning!

Prevent damage to internal electronics from electrostatic discharges (ESD) by discharging your body to a grounding point (e.g. use of wrist strap), before the lid on top/front of the unit is removed.

## $\triangle$

Warning! Do not open connected equipment.
Prevent access to hazardous voltages by disconnecting the unit from AC/DC mains supply and all other electrical connections.

## NOTE

When configuration via DIP-switches, the settings of DIP-switches configure the unit only after a reboot (power off/on).

## To be observe when the DIP-switches will be configured

::: Speed and duplex setting only valid when auto-negotiation is disabled.
:: When monitoring selected all outgoing packets from the switch is also copied to the port 1.
::: Speed and duplex switch settings are ignored for FX ports.
::: If auto-negotiation and auto MDI/MDI-X disabled all TX ports support MDI-X configuration.

## Installation

## Mounting / Removal

## Before mounting or removing the unit:

Prevent damage to internal electronics from electrostatic discharges (ESD) by discharging your body to a grounding point (e.g. use of wrist strap).

Prevent access to hazardous voltages by disconnecting the unit from AC/DC mains supply and all other electrical connections.

## Mounting

This unit should be mounted on 35 mm DIN-rail which is horizontally mounted on a wall or cabinet backplate.
This unit uses convection cooling. To avoid obstructing the airflow around the unit, use the following spacing rules.
Recommended spacing 25 mm ( 1.0 inch) above/below and 10 mm
 ( 0.4 inches) left/right the unit.
Snap on mounting, see figure

## Removal

Press down the black support at the back of the unit, see figure.
