

# AWK-3251A-RCC Series

## Wi-Fi 5 railway wireless access points/clients

### Features and Benefits

- IEEE 802.11a/b/g/n/ac Wave 2 AP/client
- Concurrent dual-band Wi-Fi with aggregated data rates up to 1.267 Gbps
- Latest WPA3 encryption for enhanced wireless network security
- Designed specifically for rail carriage-to-carriage communication
- Millisecond-level Client-based Turbo Roaming<sup>1</sup>
- Built-in 2.4 GHz and 5 GHz band pass filter for more reliable wireless connections
- -40 to 75°C wide operating temperature range (-T models)

### Certifications

## Introduction

The AWK-3251A-RCC Series industrial wireless AP/client is designed to meet the growing need for faster data transmission speeds through IEEE 802.11ac technology. The Auto Carriage Connection (ACC) feature enables easy deployment of wireless devices and increases the reliability of wireless carriage backbone networks. The AWK-3251A-RCC Series is also optimized for passenger Wi-Fi services and supports up to 120 client connections. The AWK-3251A-RCC Series complies with sections of the EN 50155 standard specifications covering operating temperature, power input voltage, surge, ESD, and vibration, making the product suitable for a variety of industrial applications. The AWK-3251A-RCC Series can be powered via PoE to facilitate flexible deployment and can operate concurrently on both the 2.4 and 5 GHz bands in AP mode.

### Advanced 802.11ac Industrial Wireless Solution

- 802.11a/b/g/n/ac compliant railway dual-band access point with aggregated data rates of up to 1.267 Gbps
- WPA3 encryption for enhanced wireless network security
- Supports ACC technology for wireless inter-carriage connections
- Supports up to 120 device connections and client isolation

### Advanced Wireless Technology

- Seamless roaming with client-based Turbo Roaming<sup>1</sup> for < 150 ms roaming recovery time between APs (Client Mode)

### Industrial Ruggedness

- Integrated antenna isolation designed to provide protection against external electrical interference
- -40 to 75°C wide operating temperature models (-T) for smooth wireless communication in harsh environments

## Specifications

### WLAN Interface

WLAN Standards	2.4 GHz: 802.11b/g/n with 256 QAM support 5 GHz: 802.11a/n/ac Wave 2 with 256 QAM support
Frequency Band for US (20 MHz operating channels)	AWK-3251A-RCC US Models Only: 2.412 to 2.462 GHz (11 channels) 5.180 to 5.240 GHz (4 channels) 5.260 to 5.320 GHz (4 channels) <sup>2</sup> 5.500 to 5.700 GHz (11 channels) <sup>2</sup> 5.745 to 5.825 GHz (5 channels)

1. The Turbo Roaming recovery time indicated herein is an average of test results documented, in optimized conditions, across APs configured with interference-free 20-MHz RF channels, WPA2-PSK security, and default Turbo Roaming parameters. The clients are configured with 3-channel roaming at 100 Kbps traffic load. Other conditions may also impact roaming performance. For more information about Turbo Roaming parameter settings, refer to the product manual.
2. DFS (Dynamic Frequency Selection) channel support: In AP mode, when a radar signal is detected, the device will automatically switch to another channel. However, according to regulations, after switching channels, a 60-second availability check period is required before starting the service.
