

EN 50155 Managed Gbps Routing Switch

Viper-12A Series

- Compact 12 port routing switch, approved for rolling stock
 - Up to 5 x 1 Gbps ports
 - Single model 24-110 VDC ($\pm 30\%$) power range
- Designed and built for extreme operational environments
 - Robustness-enhancing design features
 - Extensive range of approvals, by IEC/ISO 17025 certified laboratories
 - Quality-focused engineering and production located in Sweden
- Powered by WeOS, Westermo's proven network operating system
 - Strong set of protocols and functions, including layer 3 routing, DHCP (server and client) and VRRP depending on model
 - High level cybersecurity
 - Easy to use

NFPA 130
Fire Protection

The Viper-12A series consists of managed 12 port routing switches optimised for the needs of the railway rolling stock market. Gbps ports cope with high bandwidth devices such as access points and NVRs (Network Video Recorders).

The Viper-12A series is designed to withstand the tough environment on-board trains, exposing the switch to constant vibration, extreme temperatures, humidity and a demanding electrical environment.

A GORE-TEX® membrane prevents internal condensation. Threading integrated in chassis provides for additional vibration resistance. High-level isolation between all interfaces enables direct connectivity to vehicle auxiliary power and protects against overvoltage and flashover. IP67 protection prevents ingress of water and dust. An overall optimised design results in an extremely compact package in combination with very high MTBF for easy integration and low lifecycle cost.

Thorough type testing at independent ISO/IEC 17025 and ILAC MRA certified labs, accredited to a wide range of standards, show that the Viper series fulfills EN 50155 and other requirements. The state-of-the-art Westermo production facility ensures the quality of each individual unit, e.g. through temperature cycling burn-in testing.

The WeOS operating system offers an extensive suite of IP networking features for resilient and flexible networks, e.g. the FRNT ring protocol with very fast failover. The powerful layer 3 routing capability is very useful for separating networks in complex applications. The backup device accessory matches the Viper in robustness and offers easy configuration update and backup.

Meeting the requirements of the railcar market, the Viper-12A series is very well suited for deployment in any other application with severe operating conditions and tough environments, for instance in the mining industry.

Specifications - Viper-12A Series

Technical data	
Dimensions (W x H x D)	175 x 100 x 65 mm (6.89 x 3.94 x 2.56 inches)
Weight	1.4 kg
Housing	Full metal
Rated voltage	24 to 110 VDC
Operating voltage	16.8 to 143 VDC (14.4 VDC for 100 ms and 154 VDC for 1 s)
Power interruption	Class S2 (10 ms hold-up)
Operating temperature	-40 to +70°C (-40 to +158°F) (+85°C for a limited time)
Storage and transport temperatures	-55 to +85°C (-67 to +185°F)
Ingress protection	IP67
Humidity (operating)	5-95% relative humidity, operational, storage and transport
Altitude	2000 m/80 kPa

Rated current	
Max at 24 VDC	580 mA
Max at 110 VDC	140 mA

Interface	Viper-x12A	Viper-x12A-T3G	Viper-x12A-T5G
Ethernet 1 Gbps (X-coded)	-	3	5
Ethernet 100 Mbps (D-coded)	12	9	7
Backup and restore port	1	1	1
Console port (RS-232, B-coded)	1	1	1

MTBF	Viper-x12A	Viper-x12A-T3G	Viper-x12A-T5G
MIL-HDBK-217F2	557,000 h	549,000 h	544,000 h
IEC 62380	-	561,000 h	-

Type	Approval/Compliance
Climate	- EN 50155 class OT4 / IEC 60571 class TX, Railway applications - Electronic equipment used on rolling stock - IEEE 1478 class 1, condition E4 (incl Salt Mist), Environmental conditions for transit rail car electronic equipment
EMC	- EN/IEC 61000-6-2, Immunity industrial environments - EN/IEC 61000-6-4, Emission industrial environments - EN 50121-4/IEC 62236-4, Railway signalling and telecommunications apparatus - EN 50121-3-2/IEC 62236-3-2 Railway applications – Rolling stock – apparatus - Tested and verified for Class S1, DB EMC Regulation 06, Commodity team Radio compatibility in VDB Rev 1.0 (Shunting Radio) - Tested and verified for FCC part 15b class A (CFR 47) - E-Mark, Road Vehicles, E1 10R-058547
Mechanical (Shock and vibration)	- EN 61373 category 1, class A and B - EN 60068-2-27 20 g, 11 ms and 100 g, 6 ms
Insulation (Coordination and test)	- EN 50124-1, Railway applications – Insulation coordination - EN 50155/IEC 60571, Railway applications - Electronic equipment used on rolling stock
Fire protection	- EN 45545-2, Fire protection on railway vehicles - NFPA 130, Fire protection for fixed guideway transit and passenger rail system
Software	EN 50657:2017 Software Onboard Rolling Stock (Basic Integrity)
Safety	EN/IEC/UL 61010-1, -2:201, Safety requirements for electrical equipment for measurement, control, and laboratory use

Specification WeOS 4

Westermo has many years of experience developing products for industrial applications. At the heart of all Westermo networking solutions is the need for ease of use. By standardising on a single operating system for all Westermo Ethernet products this helps to simplify the installation, operation and maintenance of individual devices and complete networks. Once a user is familiar with a Westermo product, that knowledge can be readily applied to all our other devices. A web screen simplifies the configuration of many functions, whilst a command line interface allows for fine tuning.

The WeOS operating system has been developed by Westermo for its current as well as future range of Ethernet hardware products. This layer 2 and layer 3 switching solution enables Westermo to create complex multimedia ring networks and routing solutions. WeOS not only provides solutions to many challenging industrial networking issues, but also helps to protect investments by ensuring the future availability of fully compatible solutions. WeOS is the core of our latest ranges of Ethernet hardware allowing complex multimedia ring networks and routing solutions to be created.

WeOS incorporates unique functions that allow Westermo solutions to provide integration paths for legacy equipment. WeOS also enables Westermo to deliver a range of unique network security solutions, utilising elements such as stateful inspection firewalls and the IEEE 802.1X standard. Remote secure access can be provided using encrypted VPN tunnels. The WeOS Management Guide, 6101-3201, explains how many of these functions can be set up.

WeOS Standard - Layer 2 protocols and functionality
Resilience and High Availability FRNTv0/v2 flexible ring topologies (multiring, subrings and ring coupling), Multilink dual homing, IEC 62439-2 Media Redundancy Protocol (MRP) ^a , IEEE 802.1AX/802.3ad Link Aggregation (LACP and static), IEEE 802.1D Spanning Tree Protocol (STP) and IEEE 802.1w Rapid Spanning Tree Protocol (RSTP)
Layer 2 Switching IEEE 802.1Q Static VLAN and VLAN Tagging, VLAN Q-in-Q tunnelling, VLAN transparency, IEEE 802.3x Flow Control, IGMPv2/v3 Snooping, AVT Dynamic VLAN (Adaptive VLAN Trunking), Management VLAN (Management Interface concept), Static Multicast MAC filters, IEEE 802.1AB Link Layer Discovery Protocol (LLDP)
Layer 2 QoS IEEE 802.1p Class of Service, Ingress/inbound rate limiting, Egress/outbound traffic shaping
Layer 2 Security IEEE 802.1X Port Access Control, MAC Authentication, IP/MAC address conflict detection, Port Auto-Disable
Manageability WeConfig, Web interface (HTTP and HTTPS), Command Line Interface (CLI) via console port, (SSHv2 and Telnet), Local and central user authentication (RADIUS and TACACS+), SNMPv1/v2c/v3. Secure Copy (SCP), USB configuration and backup, BOOTP client, flexible alarm/event handling system, Syslog (log files on RAM/USB and remote syslog server), Digital I/O, Persistent Port Monitoring, NTPv4 Client/Server, DHCP client (including options 60 and 61), DHCP server (including options 1, 3, 6, 7, 12, 15, 42, 61, 66, 67, 82, 121 and 249), DHCP relay agent (including options 54 and 82), DDNS
SNMP MIB Support RFC1213 MIB-2, RFC 2819 RMON MIB, RFC 2863 Interface MIB, RFC 3411 SNMP Framework MIB, RFC 3433 Entity Sensor MIB, RFC 3635 Ethernet-like MIB, RFC 4133 Entity MIB, RFC4188 Bridge MIB, RFC4318 RSTP MIB, RFC4363 Q-BRIDGE MIB, RFC4836 MAU MIB, IEEE 802.1AB LLDP MIB, IEEE 802.1AX LAG MIB, IEC 62439-2, MRP ^a , UCD SNMP MIB, WESTERMO-WEOS MIB, WESTERMO-FRNT MIB, WESTERMO-INTERFACE MIB

^aAvailable as add-on-function. Please see your local Westermo sales contact to purchase a license for your product.

WeOS Extended - Layer 3 protocols and functionality ^a
IP Routing, Cyber Security and VPN Static IP routing, Floating Static Routes, Dynamic IP routing (OSPFv2, RIPv1/v2), VRRPv2/v3, Static Multicast Routing, Stateful Inspection Firewall, Modbus Firewall (DPI), NAT, 1-1 NAT, Proxy ARP for 1-1 NAT, Port Forwarding, DSCP/TOS modification, IPsec VPN (IKEv1 certificates and PSK, ESP, VPN failover), SSL VPN (Client and Server, Local and central authentication with RADIUS, address pool and address per CN, TLS authentication, WeConnect), GRE, Multinetting
SNMP MIB Support RFC 2787 VRRPv2 MIB, RFC 6527 VRRPv3 MIB

^aProducts with software level WeOS Extended include all functionality listed for WeOS Standard
